Question **1**

Correct

Mark 1.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 99; what are the mid values(corresponding array elements) in the first and second levels of recursion?

a. 89 and 99

b. 89 and 94

c. 90 and 94

d. 90 and 99 ✓

Question **2**

Correct

Mark 1.00 out of 1.00

Which of the following is a type of searching method?

a. Quick search

b. Linear search ✓

c. Bubble search

d. Merge search

Question **3**

Correct

Mark 1.00 out of 1.00

Finding the location of a given item in a collection of items is called

a. Searching ✓

b. Finding

c. Mining

d. Discovering

Question **4**

Correct

Mark 1.00 out of 1.00

In which type of search is the list divided into smaller sublists during the search process?

a. Hash search
b. Binary search ✓
c. Sequential search
d. Linear search

Question **5**

Correct

Mark 1.00 out of 1.00

What is the time complexity of binary search in the worst case?

a. O(log n) ✓
b. O🥐
c. O(n log n)
d. O(1)

Question **6**

Correct

Mark 1.00 out of 1.00

Which of the following best describes the process of a linear search?

a. Sorting the list before searching
b. Dividing the list in half repeatedly
c. Checking each element sequentially ✓
d. Skipping every second element

Question **7**

Correct

Mark 1.00 out of 1.00

In which situation is linear search more efficient than binary search?

a. When the list is small and unsorted ✓
b. When the list is large and unsorted
c. When the list is small and sorted
d. When the list is large and sorted

Question **8**

Correct

Mark 1.00 out of 1.00

Which of the following statements about linear search is true?

- a. Linear search can be applied to both sorted and unsorted lists. ✓
- b. Linear search requires the list to be sorted.
- c. Linear search divides the list into halves.
- d. Linear search is more efficient than binary search on large lists.

Question **9**

Correct

Mark 1.00 out of 1.00

In binary search, if the target element is less than the middle element, where does the search continue?

- a. In the entire list
- b. At the beginning of the list
- c. In the right sublist
- d. In the left sublist ✓

Question **10**

Incorrect

Mark 0.00 out of 1.00

What happens in a binary search if the list has an even number of elements?

- a. The lower middle element is chosen as the middle element ✗
- b. The search stops
- c. The middle element is chosen randomly
- d. The higher middle element is chosen as the middle element

Question **11**

Correct

Mark 1.00 out of 1.00

During a binary search, what happens if the target element matches the middle element?

- a. The search continues in the left sublist
- b. The list is sorted
- c. The search ends successfully ✓
- d. The search continues in the right sublist

Question **12**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

a. In the right sublist ✓
b. In the left sublist
c. In the middle of the list
d. At the beginning of the list

Question **13**

Correct

Mark 1.00 out of 1.00

If a list contains 1000 elements, how many comparisons would a binary search typically make in the worst case?

a. 100
b. 10 ✓
c. 1000
d. 500

Question **14**

Incorrect

Mark 0.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 100; What are the mid values(corresponding array elements) generated in the first and second iterations?

a. 90 and 99
b. 94 and 99
c. 89 and 94
d. 90 and 100 ✗

Question **15**

Correct

Mark 1.00 out of 1.00

_____ search takes a sorted/ordered list and divides it in the middle.

a. Linear

b. Binary ✓

c. Both (1) & (3)

d. Hash
